The Mountain Horticultural Crops Research & Extension Center is located in the southern Appalachian mountains of western North Carolina near Asheville. More than forty faculty and staff, from the North Carolina State University College of Agriculture and Life Sciences and the College of Natural Resources, conduct research and extension programs for the departments of Entomology, Forestry, Horticultural Science, Plant Pathology, Soil Science, and Biology. The Center also houses the administrative offices for the North Carolina Cooperative Extension Service West and West Central Districts.

The Center strives to help the people of western North Carolina improve their lives by conducting applied research, and developing and implementing highly effective extension programs related to agriculture, the environment, family, and community.
